## **PROFILE**

Web developer with 1+ years of experience in web application development. Has a special interest in web development and continues to improve skills by utilizing programming languages such as PHP, Python, SQL, and JavaScript. Experienced in designing attendance systems, integrating APIs, and using low-code platforms (HCL VoltMX, Outsystem). Also accustomed to working with modern frameworks such as Vue, Laravel, and CodeIgniter. Possesses the ability to work effectively in a team and is committed to continuously developing scalable web development skills.

---

## **EDUCATION**

### **Integrated Technology College Nurul Fikri**

Bachelor of Computer Science | GPA 3.96/4.00

September 2020 - March 2024 | Specialization : Backend Development & Data

---

## **EXPERIENCE**

### **No Code Low Code Developer | PT Global Infotech Solution**

July 2025 – September 2025

- Develop super apps using low-code platforms HCL VoltMX and Outsystem, focusing on development efficiency and system integration
- Designed and implemented data processing solutions using HCL VoltMX iris and Foundry for real-time data management in enterprise applications

### **Freelancer Web Developer | RME Dental Diary**

January 2025 – March 2025

- Performed debugging and optimization of Laravel-based RME Dental application, improving system stability and reducing critical bugs by 85%
- Develop new features including dynamic discount system and doctor management module with user-friendly interface

### **Back End Developer (Internship) | Journal1Zadv**

September 2024 - January 2025

- Collaborated with frontend team to integrate Laravel and Blade-based attendance system, delivering a responsive and real-time solution
  - Implemented and managed academic journal website using Open Journal System (OJS) for scholarly publications
- 

## **ORGANIZATIONAL**

### **IT Developer| Student Executive Board (BEM) STT Nurul Fikri**

March 2021 – December 2021

- Staff developing the organization's website profile to increase BEM's visibility among STT Nurul Fikri students
  - Designed and implemented responsive and modern UI/UX landing page for student engagement
-

## **TECHNICAL PROJECTS**

### **Automated Attendance System (Web-Based)**

- Implemented real-time attendance system using Laravel and Blade template engine for dynamic interface
- Integrated cron jobs to automate attendance tracking at 9:00 AM with automatic late calculation algorithm

### **SAAS Mini Drama Application (Web-Based)**

- Building a freemium system with virtual currency (coins)
- Integration with payment gateways to purchase coins
- Building a CMS with Filament
- Creating a video streaming system with a player interface

### **Library Management System (Full-Stack)**

- Built book lending application with Vue.js 3 + Tailwind CSS frontend and Laravel API backend architecture
  - Implemented RESTful API for CRUD operations and JWT token-based authentication
- 

## **TECHNICAL SKILLS**

**Backend Development:** PHP, Laravel, CodeIgniter, Node.js, RESTful API, JWT Authentication

**Database:** MySQL, Database Design

**Frontend:** Vue.js 3, JavaScript (ES6+), Tailwind CSS, Blade Template

**Low-Code Platforms:** HCL VoltMX (Iris & Foundry), OutSystems

**Other:** Google Workspace, Microsoft Office, Python, Go

## **SOFT SKILLS**

• Effective Communication • Time Management • Problem Solving • Team Collaboration • Self-Learning • Attention to Detail • Adaptability
